EXPERIENCES

InfraSec Engineer (III)

April 2021 - October
2023

Truss Inc, Remote

- Designed, implemented, and maintained extensive operations infrastructure for the support of a disparate platform of Go-based projects requiring automation and continuous deployment.
- Enhanced and developed numerous Terraform based projects providing significant improvements to infrastructure as code and automation.
- Helped reduce developer toil by moving the infrastructure CI/CD pipeline off of CircleCI and into Github Actions.
- Deployed and maintained Atlantis in multiple AWS and AWS GovCloud account environments, reducing the number of hours spent in code review for the Infrasec Team.
- Deployed Graylog and Grafana for telemetry, data aggregation, and observability for supporting the development team's application.
- Developed telemetry to automatically report and monitor noncompliant resource usage within AWS using an AWS Lambda and AWS Config.
- Performed numerous GRC-related duties pertaining to the continued maintenance of IL4-compliant authority to operate as required for the overall function of the organization. Maintained and contributed to Trussworks' OSS Terraform and AWS lambda libraries.

Full Stack Web Developer, Consultant, Contractor

February 2020 - April
2021

Quantum International

- Developed and maintained Flask applications and identity management python packages.
- Developed a CRM Flask application for penetration test reporting

Automation Engineer, DevOps

August 2019 - January
2020

ZipCar

EDUCATION

Bachelors of Science in Computer Science

Florida Atlantic University
2014 - 2016

Bachelors of Science in Mathematics

Florida Atlantic University
2014 - 2016

Associate of Science in Computer Programming

Palm Beach State College
2011 - 2013

LANGUAGES

English (Native)

INTERESTS

Tabletop Gaming

Cooking

- Developed and maintained Concourse pipelines and various automation and chatops projects.

Fullstack Developer, DevOps

June 2018 - August
2019

Intuition Machines/Hcaptcha

- Developed and maintained containerized solutions for a blockchain based image labeling platformS.

SKILLS & PROFICIENCY

Python & Django

Terraform

AWS

Docker

Kubernetes
